# **DIABETES FOUNDATION**

## *10 years of service to Humanity*

Diabetes Foundation is a registered non profit organization (charitable trust) at Visakhapatnam, Andhra Pradesh, INDIA. It was established in 1997 by Anuradha Reddy. The mission of the Diabetes Foundation is to help and provide hope to all the deserving under-privileged people. In the course of 10 years of service of Diabetes Foundation to humanity we were able to translate the vision into reality through positive acts of service by touching the lives of the diabetes, AIDS, cancer, destitute, differently able people like visually challenged, physically challenged, geriatric people and disenchanting. It has also meant food for starving, precious pure water for the thirsty, a healthy future for infants, solace for the lonely, a brighter and happier world for the young and a meaningful existence for those in the twilight of life. Last but not the least, for the last ten years, Diabetes Foundation has been lighting candles of hope and spreading the warmth of service wherever the cold darkness of hunger, despair, ignorance and conflict has spread its long shadow. The challenge is daunting, but we are optimistic. We are pleased to be a part of this effort to take care of under-privileged people in bringing a smile on their face.

*Large number of Patients getting blood tests*

*Bilingual Newsletter of the Foundation*
